Migueletes 881 - 3A

Buenos Aires - Argentina

I. PROFILE

Born on September 8 of 1970 in Lima, Peru, relocated to Buenos Aires, Argentina in 2008. Involved on all technical roles related to web projects for 2+ decades, passionate for all open source technologies.

II. EXPERIENCE

Atomic Reach - Frontend developer

2019 - 2020

Remote - Canada - <https://www.atomicreach.com>

Hired by Band of Coders in a frontend developer role to provide bug fixes and code reviews to the React SPA web app and the WordPress plugin. The plugin had two versions, a vanilla JS codebase for the WordPress Classic editor and a React app for the Gutenberg editor. I was in charge of frontend duties but had to test the whole flow managing my own linux instance containing the Zend framework PHP API in order to detect bugs.

DEV: React, Redux, HTML, vanilla JavaScript, tinyMCE, jQuery.

BUILD: WordPress, Linux VM with PHP Zend framework + MySQL.

TEST: Jest.

HYP3R, Tech Leader

2015 - 2019

Remote - USA - <https://hyp3r.com/>

As the technical leader for the 'Engage' web app I was in charge of a five members team that built and maintained the enterprise SPA web app and the mobile app. 'Engage' allowed enterprise customers like Marriott or Norwegian Cruise Line to engage with their customers on near real time using Instagram, Twitter or Weibo (for the Chinese market).

The team worked remotely across multiple timezones, with main headquarters in San Francisco and developers from Costa Rica, USA, Puerto Rico, Argentina and Colombia.

The web app was developed using a mix of AngularJS, React and vanilla JS, it was built using Gulp + Browserify. We also developed a private web browser extension available only for customers that ran on Chrome, Firefox and MS Edge.

DEV: HTML5, CSS3, Less, AngularJS, React, Redux, Styled-Components, Masonry, Bootstrap, Axios, Google maps, Mapbox.

BUILD: Gulp, Browserify, Babel, CircleCI, Storybook.

TEST: Jest, Enzyme.

Gforge Group Inc. - Senior PHP Developer**2013-2015**Remote - USA - <https://gforge.com>

Senior PHP developer in a five members team, building new features and providing maintenance for the company enterprise web app.

GForge AS is a SaaS application that provides project management, team chat, continuous integration, git code reviews, git pull requests, etc. I developed PHP code and built functionality on Angular JS for the chat module.

DEV: HTML5, CSS3, PHP, AngularJS, pure JavaScript.

BUILD: Jenkins.

TEST: PHPUnit, Jazmine.

Playdom, Disney Interactive - Tech Leader**2012-2013**In Site - Argentina - <https://en.wikipedia.org/wiki/Playdom>

Lead a team developing and maintaining the 'Criminal Empire' Facebook game. Game customers required high availability on heavy traffic for the web and mobile apps. Senior developer on confidential mobile projects.

Playdom Argentina offices closed in September 2013, and the whole company closed on 2014.

DEV: OOP PHP, MongoDB, Backbone, Google Apps Scripts, Jenkins, Jira, Github, Git, Maven, Spring.

TEST: PHPUnit.

LiveOps - Tech Leader**2011-2012**Remote - USA - <https://www.liveops.com/>

Hired by GlobalLogic Argentina as Tech lead for a 10 member team in La Plata city and Buenos Aires.

Received a 6 weeks training course in San Jose, California. In charge of development and maintenance of the web module, RTM (Real Time Monitoring) area and security for the LiveOps SaaS callcenter application.

Developed Perl web modules, JavaScript integration with Salesforce service, Linux maintenance, QA scripting automation.

DEV: Perl (mod_perl, Mason perl framework, scripts), MySQL, Rally, CVS, SVN, Git, JavaScript, JQuery, CoffeeScript, Backbone JS, Rally, Bugzilla, Linux, Ruby, HTML, CSS, Redis.

TEST: Custom Perl unit test modules.

Electronics Arts - PHP Tech Leader**2010 - 2011**Remote - USA - <https://www.ea.com/>

Hired by Globant to develop a real time web report system using LAMP for Electronic Arts (EA).

The system provided statistics for EA online games on all their platforms (PS2, PS3, XBOX 360, Wii, etc.).

DEV: PHP Symfony, MySQL, Linux, JavaScript, JQuery.

TEST: PHPUnit.

Playdom, Tech Leader**2009 - 2010**Remote - USA - <https://en.wikipedia.org/wiki/Playdom>

Hired by Globant to lead the team in charge of the Poker Palace / WSOP poker game for the US Playdom company branch. The web app ran on Facebook, Hi5 and MySpace.

DEV: ActionScript, Java, PHP, JavaScript.

Globant, PHP developer, Tech Leader**2009 - 2011**In Site - Argentina - <http://globant.com>

Lead in site and remote teams for multiple projects, from FaceBook applications to web apps and online games. Team members had different seniority levels and profiles, they were proficient on multiple technologies such as Java developers, ActionScript developers, PHP developers, QA engineers, etc.

In charge of technical interviews for PHP developer candidates.

Support the CTO department providing analysis and technical advice on confidential SOW documentation.

DEV: Facebook API, REST APIs, JQuery, CakePHP, PHP Doctrine ORM, ActionScript 3, Java, PHP Zend framework, CSS, Javascript, MySQL, PHP Code Igniter, PHP Symfony, Open Social, Jira, Confluence, Perforce.

BUILD: Ant, Hudson.

Amauta Technologies - Sr. developer, Tech Leader**2002 - 2009**

In Site / Remote - Peru / Argentina / USA

Lead a developers team building and providing support for websites, frontend and backend modules for customers in Los Angeles and New York.

In 2002 developed Panaka, an online web drive service using mod_perl installed on customer dedicated servers. It worked as a primitive DropBox.

Relocated to Argentina in 2008 to start a local office for the company. The company closed in 2009.

Projects: Toyota Scion site, Toyota Mundo Yaris site, isuma.tv (canadian portal), Sanrio online licensing approval system, La Agencia de Orci site, Casanova Pendrill site, AIM V site, aiwaworld.com dynamic content, Art Center College of Design site facelift, panaka.com Perl backend engine, etc.

DEV: Perl scripting, mod_perl, OOP PHP, PHP Zend Framework, Ajax, Prototype, JQuery, Dojo, Scriptaculous, LAMP, Cocoa, ActionScript 3, HTML, CSS, Javascript, SVN, Regular Expressions, Pluck API.

Phantasia Media Interactiva (now Wunderman), Developer**1997 - 2002**In Site - Peru - <http://www.wundermanthompson.pe/>

First IT employee on the company. Lead the development team in charge of creating and maintaining web sites for the company customers like Telefonica Peru, BellSouth Peru, the Presidential elections in 2001, etc.

DEV: LAMP, Java, HTML, CSS, Javascript, Linux servers administrator, Macromedia Dreamweaver, Macromedia Fireworks, MS Frontpage.

INDECOPI, Intern**1996 - 1997**In Site - Peru - <http://www.indecopi.gob.pe>

Technical support for 200+ work stations. Novel Netware 4 management. Development of the official site.

Technical support in legal raids requested by companies as Microsoft or Adobe, searching for bootleg software at commercial companies.

DEV: Novel Netware, HTML, Javascript, CSS, C language CGIs.

III. EDUCATION

- NG-Conf Angular Conference, Salt Lake City 2017.
- Private english classes provided by Globant and GlobalLogic.
- Morton Taylor Teaching Services - 2007, certificate on Advanced 1st Level of English. Private conversation classes.
- PMP official course for Project Management Professional in Escuela de Postgrado of Universidad Peruana de Ciencias Aplicadas 2007 (Incomplete, <http://postgrado.upc.edu.pe>).
- CIBERTEC, 3 years technical degree in computing science (1995-1999, <http://www.cibertec.edu.pe>).
- Universidad Nacional de Ingenieria UNI (1987-1989, Incomplete <http://www.uni.edu.pe>)

- San Agustin High School, Lima Peru (1981-1986, <http://www.sanagustin.edu.pe>).
-

SKILLS

ADVANCED

Technologies I used for most of my projects, usually requiring compilation, installation, configuration and management:

- SPA web development using JavaScript ES6, React, AngularJS, styled components, Redux.
- Build projects with Gulp, Browserify, Webpack, npm, Chrome extension API, git, storybook.
- Linux distributions: Red Hat Enterprise Linux 4 & 5, Debian, Ubuntu, Gentoo, Open SuSE, Fedora, CentOS, Linux Mint. Used linux as workstation for 5 years.
- Linux services: Apache web server, MySQL database server, PostgreSQL database server, nginx, redis, mongoDB.
- Development languages: OOP PHP, Symfony, CodeIgniter, Zend Framework, CakePHP. Perl scripting, mod_perl, Mason framework.
- Web technologies/Scripting: HTML5, CSS3.

INTERMEDIATE

Technologies I have used on multiple projects through the years, but I don't have in-depth experience. As an example I have known Java for 10+ years now but never was part of a complex project, only simple sites or specific applications.

- Linux services: Flash Media Server 2, Mail (Qmail, Postfix, Courier, WU IMAP, Dovecot), FFmpeg video converter, ImageMagick image manipulation software, Openfire chat server, versioning systems (CVS, SVN, Perforce), web statistics (AWStats, webalizer), FTP server (Pure-FTPd, ProFTPD, vsftpd).
- Server management services (installation, configuration, management): DirectAdmin, Webmin.
- Development languages: Java (JSP, servlets, javabeans), Actionscript 3.0, PHP Doctrine ORM, Bash scripting, Regular Expressions.
- Web technologies: Adobe Flash, Adobe Flex, Adobe Dreamweaver, Adobe Fireworks.
- Other: SCRUM, Agile methodologies, Rally.

NOVICE

Technologies used for a single specific project or for research purposes in behalf of clients. Some are deprecated:

- Linux services: Jakarta/Tomcat java server, Darwin Streaming server, Spamassassin, ClamAV antivirus, Oracle database server, Sendmail, DNS nameserver, firewall with iptables, mailman mailing list.
 - Web technologies: Microsoft Frontpage beta version, Sun solaris.
 - Languages: C, Objective C, Apple Cocoa, Apple Carbon, Applescript, WML, Ajax frameworks (Jquery, Prototype/Scriptaculous, Dojo, Backbone), Coffeescript, HAML, Ruby, Python.
 - Other: Novell Netware 4, Hudson CI, Apache Ant, Bugzilla.
-

IV. LANGUAGES

- English - professional level.
- Spanish - native language.
